Hat Trick (Atari 2800)

- Same
- 280

- Little-endian
- Reset at address $8000$
- 256K RAM at low memory
- 64K address space

- EXY

- BC - ptr to threaded code
- IX - ptr to return stack
- SP - ptr to data stack
- IY - always $0043$
- design choices
- alignment (data/code)
  2^1 Infocon's "z"-machine

\[
\begin{align*}
\text{bbbbbbbb} & \div \text{2} \\
\text{2}^{10} & \quad (\text{correction})
\end{align*}
\]
