How to Present
Saul Greenberg
University of Calgary

The Message

Prepare yourself
- know your message
- know your audience & venue
- practice, practice, practice

Typical presentations
- top-down structure
- keep it simple
- use media effectively

Style
- stay in control
- use body language
- let your enthusiasm show!

Outline

Why present?
Presentations you may give
Structure
Style and tips
Use of media
Handling questions

Why present?

Science includes the dissemination of knowledge

Audiences are opportunities
- get them interested in your work
- associate your "face" with the work
- provide discussion / feedback

The downside:
- risky!

Presentations you may give

Research papers
- seminar/conferences, workshops

Surveys / topic introductions
- tutorials/conferences/class

Discussions / points of view
- seminars, workshops
- panels

Defense of known subject matter
- thesis, proposals
Presentations you may give

Audiences
- topic specialists
- area specialists
- computer scientists
- scientists
- academics
- public

As room size increase, so does:
- formality
- inability of audience to cope with detail

Structure

The Opening: 1 1-2 minutes
- Introduce yourself and co-authors
- Tell them what you are going to tell them
- Define the problem
- Provide a road map (outline)

The Opening: 2 ~5 minutes
- Tell them why they should listen
- Motivate the audience
  - define the problem in greater detail
  - emphasize goal and contributions
- Background / terminology
  - relate to earlier work
  - avoid or explain jargon

The Body
- Tell them
- Describe what you did, and how you did it
- Explain its significance

Conclusions 2-3 minutes
- Tell them what you told them
- Summarize purpose and main point(s)
- Discuss current work/open problems
- Indicate your talk is over
I can’t overemphasize the importance of **being clear in your own mind** what you want the audience to get from your presentation. Only then can you really concentrate on doing a good job of getting it across.

**Style and Tips**

Don’t get bogged down in details
- will lose people and never get them back
- main point forgotten by audience
- fit details to your audience

**Keep it simple**

**Style and Tips**

Good body language
- be enthusiastic
- maintain eye contact
- speak clearly and audibly
- don’t read

**Use your voice and body**

**Style and Tips**

Timing
- adjust content to fit
- don’t rush

**Watch the time**

**Style and Tips**

Prepare, practice, revise, practice
- get talk to match slides
- know your notes, but don’t rely on them
- get feedback
  - friendly but critical audience

**Practice, practice, practice**
Style and Tips

Notes:
- points to present
- reminders
- not a script

Notes are your friend

Media Setup

Always have backups

Microphone
- placement & sound check

Screen
- visibility
- size
- lighting

Seating

Media

None
- focus is on you

But
- practiced speakers are best

Whiteboard
- for small rooms/groups
- for developing examples

but
- slow

Slide deck
- the norm
- text / images / videos
- static and dynamic content

but
- less text per slide
- expect poor lighting
Media

Video and demos
• showing vs explaining
• tells the story

but
• don’t let them take over

Proxemic Media Player (2010)

A video media player

senses
• distance and orientation of a person

reacts by
• turning itself on
• progressive detail
• interaction techniques tuned to distance

Too much detail; cluttered

Appearance of Media

None
• practiced speakers are best at this, because they are comfortable talking to the audience

Whiteboard
• this is best for small rooms, for groups, and for developing examples where the example unfolds over time
• it’s really too slow a medium, because it takes time to write things down!
• it also puts your back to the audience

Transparencies
• must be legible by people at back of your expected meeting room in bad lighting conditions (assume the worst!)
• of course, it should be typeset. Some good things to remember are:
  - large, variable width fonts
  - uncluttered, with only a few easily remembered points on the slide that you can talk around
  - white space used as hints
• don’t prepare too many, because people won’t remember. Around 1.5-2 minutes/overhead or more is a reasonable rule of thumb
• people remember visuals, so prefer pictures/tables over words if possible

Appearance of Media (16 point courier)

None
• practiced speakers are best at this

Whiteboard
• best for small rooms/groups
• best for developing examples
• very slow

Transparencies
• must be legible by all (assume the worst!)
• typeset
• don’t prepare too many
• prefer pictures/figures/tables over words
APPEARANCE OF MEDIA

NONE
- PRACTICED SPEAKERS ARE BEST AT THIS

WHITEBOARD:
- BEST FOR SMALL ROOMS/GROUPS
- BEST FOR DEVELOPING EXAMPLES
- VERY SLOW

TRANSPARENCIES
- TYPESET
- DON’T PREPARE TOO MANY
- PREFER PICTURES/FIGURES/TABLES OVER WORDS

Appearance of Media

None
- practised speakers are best at this

Whiteboard:
- Best for
  - small rooms/groups
  - developing examples
- very slow

Transparencies
- must be legible by all (assume the worst!)
- typeset it
- don’t prepare too many
- prefer pictures/figures/tables over words

Appearance of Media

None
- practiced speakers are best at this

Whiteboard
- best for small groups
- best for developing examples
- very slow

Transparencies
- typeset
- don’t prepare too many
- prefer pictures/figures/tables over words

Appearance of Media

None
- practiced speakers are best at this

Whiteboard
- best for small groups
- best for developing examples
- very slow

Transparencies
- typeset
- don’t prepare too many
- prefer pictures/figures/tables over words

Alignment & white space

Appearance of Media

None
- practiced speakers are best at this

Whiteboard
- best for small groups
- best for developing examples
- very slow

Transparencies
- typeset
- don’t prepare too many
- prefer pictures/figures/tables over words
Question/Discussion

Anticipate questions ahead of time
• dry runs help

Turn “bad” questions into good ones
• always repeat the question

Maintain control
• guide discussion
• limit time on minor/irrelevant

The Thesis Oral Presentation

Why?
• a warm-up period for you and the examiners
• reminds examiners what they have read

What?
• objective of your work
• very brief overview/motivation/history
• highlights of your methodology/results
• main contributions
• future directions

To prepare
• mock defense

Summary

Prepare yourself
- know your message
- know your audience & venue
- practice, practice, practice

Typical presentations
- top-down structure
- keep it simple
- use media effectively

Style
- stay in control
- use body language
- let your enthusiasm show!
